Vision

“To serve the Nation for Longtime with New fresh look, Sustainable Green, Pollution free, Energy efficient and Economically viable Glazing solutions.”

Aim

“To serve the People without hindering the Environment much for a better Living Atmosphere in the Urban area and in the process increase the Employment facility.”

Ethical Values

INTRODUCTION

Bangladesh Double Glazed Limited (BDGL) is the fresh new look at glazing technology in Bangladesh. With a view to produce sustainable, green, energy efficient, pollution free & economically viable glazing solutions. BDGL started it's journey with assurance of best quality in the contemporary market.

BDGL offers "economy in investment" for cooling systems as the double glazed premises can be chilled with smaller cooling unit. As a result it saves 30% - 40% monthly operating expenses on energy/electricity. Such green technology also offers noise and pollution free sustainable green buildings. Equipped with modern automatic production line machineries, BDGL's state of the art glazing solutions i.e. insulated glass panels; sliding & hanging windows; sliding, swinging or folding doors & customizable sized blocks are the ultimate smart and green choice for the modern builders.

BDGL assures producing finest quality glazing solutions with most modern machineries from world's best reputed company. Thus, only BDGL dares, offering replacement guarantee for considerable period including after sales service in the country.

BDGL – truly, innovation in glazing.

Save expense on Air-Conditioning

In modern commercial and residential structures, air-conditioning (both cooling and heating) incurs the major operating expense on energy – but not anymore!

BDGL double glazed glasses insulate your structure to ensure no heat is lost through spaces between doors and windows, thus cooling or heating rooms at the fastest possible time using the least amount of energy – so the air-conditioner does not need to keep running all the time!

Economy in Investment

The comparatively higher capital expenditure on using double glazed solutions for your structure, is justified by the 30% - 40% savings made on monthly operating expense on energy. It also increases the longevity of air-conditioner.

With time, not only does it offset the incremental capital expenditure, but goes on to save more and more of your money that you would have otherwise spent on your energy bills on a monthly basis and reduces the maintenance cost of air-conditioner.

Pollution free "Green" technology

BDGL products are glazed using the best in class machineries in an environment friendly manner. Glass panes are sealed using pure environment friendly argon gas, giving us confidence to provide "Frost Free Guarantee".

Immaculate sealing of BDGL glazed products ensure that no sound, heat or pollution can enter your structure – giving it a noise free, pollution free, tempered atmosphere.

Benefits of Double Glazed Glass

Reduce Unwanted Noise

Reduce Unwanted Heat

Reduce Unwanted Electricity Consumption

Awesome Outlook

WHY BDGL

DECA Automated Machineries

BDGL is using DECA Automated Machinery's which ensure the best performance of glazing and most accuracy in fabrication.

Long Term Warranty

BDGL ensure long term warranty for both glazing performance and any kind of hardware replacement.

Two Decades of Experience in Glazing Solutions

Few directors of the company have more than 20 years experience in glazing manufacturing solutions at varied capacities, including more than 5 years of experience in double glazing solutions.

After availing necessary expertise over the years by outsourcing glazing solutions from abroad, they have decided to establish double glazing solution plant in Bangladesh, thus forming Bangladesh Double Glazed Limited (BDGL) in collaboration with distinguished personalities, with experience in heterogeneous industries, from Bangladesh & abroad.

Service:

We have hassle free end to end service for our customers which begins with Installation by expert professionals.

After Sales Service:

We have an unique customer service team who can provide solution for all kinds of after sales service as per clients requirements. Our exceptional & exemplary service is well known and we have a group of happy customers. Our after sales service includes the following:

The performance of Double Glazing is for 25 years and it is guaranteed that there will be no indifferences in performance by that time. But then again, In any inauspicious situation, if vapor originate between two glasses, we will replace the glass.

If there is any leakages of water occurs, we will remove the existing seal and seal that part again.

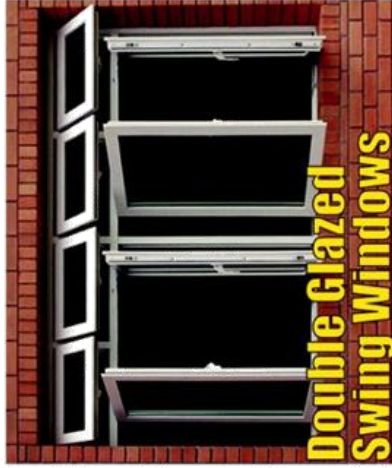

In any unusual circumstances from our side, if the glass breaks, we will replace the glass within seven days or less.

OUR PRODUCTS

The sliding windows/doors are designed to glide horizontally with two or more operating panels, which can be moved left and right. They fit into tighter spaces than our traditional windows / doors they are easy to operate and add uniqueness to your home modern or traditional.

Double Glazed Sliding Doors

Double Glazed Swing Windows

Double glazed Folding windows/doors are breath-taking. They can transform a room, creating a whole new feel for your home linking rooms together and seamlessly joining inside living with outside space. Versatile and pleasing, folding windows/doors are the ideal replacement for ground floor windows, flooding a room with natural light and lots of fresh air.

Double Glazed Folding Doors

Top Hung windows have one operating sash that move outer way allowing for ventilation. The Benefit that attracts customers about top hung windows is, in rainy season, the rain doesn't pass into the house even if the windows are open.

Double Glazed Hung Windows

The swing windows/doors provide both ventilation and comfort for cleaning. This type of widow/doors allows for full ventilation from top to bottom of the widow/door opening. The extended sash can catch the breeze and direct it into the house for better air flow.

Double Glazed Fixed Windows

These type of windows are most cost effective than other types of windows. Moreover, it performs better on sound pollution and energy savings.

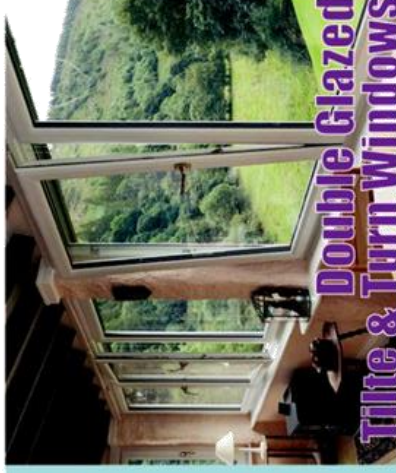

SPIDERGLASS is a modern solution for exterior bolted glass assemblies, which secures the glazing to support the structure. The high-grade stainless steel fixings are designed to absorb all static and dynamic loads (i.e. the dead weight of the glass, wind loading, snow loads and differential expansion due to temperature difference) and distribute them to the support structure.

Facade Spider Curtain Wall

OUR PRODUCTS

The Tilt & Turn window has two distinct functions: swing it in like a door or tilt the top of the sash into your room for ventilation. One handle controls both operations. The tilt & turn is a great window for unique situations where you want additional ventilation or access.

**Double Glazed
Tilt & Turn Windows**

Double glazed is two panes of glass which require certain space in between. The space is filled with argon gas for energy saving & reduce sound pollution.

**Double Glazed
Glass Panes**

**Double Glazed
Wave Doors**

The Wave door is a new-generation multi-pane door that enables home owners to maximize their living space. Unlike Bi-folds, the Wave door is easy to operate & it doesn't encroach on internal space when opening or closing. Any part of the door can be opened for ventilation or access. It even operates as a partition.

**Facade Stick
Curtain Wall**

It's an pretty old concept of facade design. A Facade stick curtain Wall is defined as thin, usually aluminum-framed wall, containing in-fills of glasses. The wind and gravity loads of the curtain walls are transferred to the building structure, typically at the floor line.

Semi-unitized curtain walls are suitable for smaller projects or larger projects that requires many wall conditions. In this system, the mullion members are separately installed first, then pre-assembled framing units are placed between them. These units may be full story height, or divided into a spandrel unit and a vision glass unit.

**Facade Semi-Unitized
Curtain Wall**

The Wall Cladding serves as superb wind barrier and protects walls from dampening. It has the capacity and strength to protect the walls from extreme weather conditions. The wall cladding draws a lot of admiration, with its carved style with the scope of designing in both interiors as well as exteriors. It is widely used in exterior walls to make the building more stunning.
